

Review on the Konstanta Soot Use - Lyuk Plast

Report on usage of Konstanta industrial soot TC 2166-002-97792255-2007 produced on the equipment manufactured by Jelezno LLC (Rostov-on-Don) as a colorant.

Ljuk Plast LLC produces high-quality sand-polymeric products for industrial and private usage. One of the raw meal components is a colorant of a certain fraction composition. Stable granulometric composition of colorant (Konstanta industrial soot) produced by Jelezno LLC provides high-quality and uniform distribution over entire product: the products have deep colour, do not fade and decay.

Colorant (Konstanta industrial soot) quality wrapping and the wide range of packaging make it appropriate for the whole line of sand-polymeric products.

Coloristic characteristics of a colorant (Konstanta industrial soot) produced by Jelezno LLC meet our requirements and do not yield to any other colorant based on carbon black and graphite. Good price, fast production of colorant (Konstanta industrial soot) and constant stock availability make Jelezno LLC our reliable partner.
